Title Card Printing

JukeCD provides many title card print options to maximize the space available on a title card. On the Print Preview screen you can easily adjust every item on the title card. Change the position, font, color and alignment of every text item. Displayed below are examples of some arrow options.

TRACK NO. NEXT 2 DIGITS	02	DISC NO. FIRST 2 DIGITS
▼	THE BEATLES 1962-1966 (DISC 2)	◀
HELP!		

Standard arrows gives you the classic look, but requires more space on the card.

THE BEATLES 1962-1966 (DISC 2)	
0201	HELP!
0202	YOU'VE GOT TO HIDE YOUR LOVE AWAY
0203	WE CAN WORK IT OUT

The combined disc #/track # option removes the arrows, printing a play code in front of the track.

JukeCD provides the tools to design your title cards to look how you want them to look. Print the album cover art, shade alternating tracks for easier reading, change the arrows text, add an information line and much more.
